THE WORLD OVER

SINGLE GIRLS TO LOSE POSITION

WINE, WHEAT CHANGE POLICY

DAILY SERVICE OVER ATLANTIC

ROME—Italy ought to have more babies, Benito Mussolini believes, so last week he set out to deprive all marriageable males of their jobs.

The result, it does himself have predicted, will be that they'll have to find themselves husbands. And henceforth every single man who tries to get work with the government will have to prove his intention to be married, and private industry will be requested to set up similar requirements.

PARIS—Exchange of Canadian wheat for French wine, through reciprocal favorable tariff treatment was the main theme of conversations between Prime Minister R. B. Bennett of Canada and Lucien Lamoureux, French minister of commerce.

Premier Bennett, who arrived in Paris on Thursday, was warmly covered from the indignation that kept him indoors for some time at Geneva, and spent practically the entire day in negotiations to extend the present Franco-Canadian trade treaty. When the Franco-Canadian trade treaty was concluded, it brought additional concessions for French wine but these were not possible owing to the Ottawa agreement. On the other hand France, with a surplus of 75,000,000 bushels, is now exporting her soft wheat. But she always needs hard for milling purposes and it is this market which the Canadian negotiators hope to develop.

ST. JOHN'S, Nfld.—A projected daily transatlantic air service from the British Isles to Newfoundland has been outlined to the Newfoundland commission government by Charles Fygher, representing Atlantic Airways, who seeks the right to use St. John's harbor as a base for flying boats.

Fygher has told the commission that the ocean line would link up with a British Airways system with Canada and America services. For the transatlantic service, planes capable of carrying eight to 10 passengers and with a speed of 250 miles an hour would be used.

Announcement!

WE WISH TO ANNOUNCE TO THE GENERAL PUBLIC THAT WE HAVE TAKEN OVER THE BUSINESS KNOWN AS THE CARBON BAKERY AND HAVE ENGAGED A FIRST CLASS BAKER TO HANDLE ALL REQUIREMENTS.

Alberta News Bulletin

Unemployment Less

Answering the call by Alberta farmers for workers in the harvest fields, many of the province's unemployed have been taken off the lists during the past few weeks. Total unemployed listed with the employment service is reduced by 144 from the previous week's total. Week ending September 14, reveals 7,606 unemployed applicants on the lists as against 9,752 for the week before.

Assist Organization Under Marketing Act

Organization of livestock and poultry interests in Alberta to assist in marketing of agricultural products under the new federal marketing act, will be conducted by E.W. Brundsen, Calgary, secretary of the Western Stock Growers' Association, and organized by the provincial department of agriculture. It is the purpose of the act to assist the producers in the province who have begun the work of organizing to market their products under the new federal legislation. He will devote his full time to the work for a short period in an effort to alleviate the difficult circumstances in which farmers generally find themselves at the present time. He will secure all necessary information to assist the producers in their work of organization.

Re-opening of Vermilion School

Definite announcement of the re-opening of the Vermilion school of agriculture, on October 20, was made this week by Hon. F.S. O'Rourke, minister of agriculture. The school at Vermilion will also open at the usual time this fall. The Vermilion school will draw pupils from the Peace River country south to the Camrose line of the C.P.R., while the Oksa school will draw from the balance of the territory in the province.

Donations of Vegetables

Appeal for donations of vegetables from those districts having an abundance of these to be shipped into the relief areas of the province is being made by the provincial department of agriculture. Local organizations such as boards of trade, service clubs or church societies are asked to supervise the collection and loading of such supplies, which are to be made in car load lots, and the department of agriculture will direct the shipment. Double barrels have agreed to transport the supplies free of charge. The cars

will be shipped care of the municipal societies in the various districts concerned, and these officials will have charge of the distribution of the donations. Some 50 carloads of such supplies are needed this year, to serve some 2000 families. Already a number of donations have been received.

Creanery Survey

A creanery survey that will continue for about two weeks is being launched under the joint auspices of the provincial dairy branch, the University of Alberta, and the dominion department of agriculture. J.R. Seavey, Alberta dairy commissioner, is in general charge of the work and will arrange the itinerary of the field workers. The purpose of the survey is to make a study of the cost of manufacturing butter in Alberta and also of the cost of trucking or otherwise delivering cream supplies. It is proposed to examine 50 per cent of the creameries in the province, of which there are 94 now operating.

RECORDS REVEAL ANCIENT BEACON

MADRID—The latest study of two famous antiquarians has drawn from an old manuscript an exact description of the famous Neanderthal light house, once the third wonder of the world.

Miguel Asin Priolero, specialist in Arabic literature, and Lopez Otero, an architect, drew up a plan of the historic beacon as described in the 12th century manuscript left by Abu Enayy, a Moslem of Malaga who lived from 1182 to 1297 and pursued his studies in Alexandria.

The lighthouse was built on an island north of the city at a distance of 1,000 meters and linked to the city proper by a jetty. It was a wide, white, ended in a viaduct opening into one of the doors of the lighthouse. The platform stood more than 20 feet above the level of the water and was made of huge limestone blocks hooked together and further held by melted lead poured into the interstices. The lighthouse itself was in three sections built upon the platform and superimposed, one upon the other. The first section was square, the second octagonal, and the third cylindrical.

Al—What started the riot last night?
Ho!—A misprint.
Al—A misprint?
Ho!—Yes, the Lyric advertised a show with three hundred acts, 700 girls and one hundred costumes.

5. GUNS AND AMMUNITION

THE gun for Skeet is the gun that is usually used by the shooter in upland shooting; in other words, the one that fits him. A good Skeet gun is essentially a good one for game birds as well.

Certainly, there is no necessity to spend hard-earned dollars on a new, special gun. If you are starting the game for the first time, and if you have never shot before, and therefore have to buy a gun, pay strict attention to fit, boring, weight, and calibre. Most important of all is to get that your gun fits. Here it is as well to get the advice of some old hand at the game, and also to gain practical experience for yourself by shooting borrowed guns for a while until the right one for you is obvious.

The sight of the gun-track at a Skeet Club would be an eye-opener to the old, prejudiced trap-shooter. Double-barrelled, single-barrelled, under-and-over, pump-action, automatic, all live up together cheek by jowl. And all the way from 12 gauge

down past the 16 and the 20s to the .24s and no one should handicap gauge, whatever the shooter owns or prefers. In rare instances only the pump-action gun for the beginner at Skeet, unless he is a wizard at it, and one hundred costumes.

Remember, a good fitting coat or shooting jacket is essential, one that does not hug under the arms. Many Skeet shots are faster than real birds, and no one should handicap himself with a badly fitting garment. Guns have to come up quickly and a little surplus ridge of cloth or buckle also may just throw you off your aim to the way you come to you that spinning target.

Tip: It is No. 5 of a series of 12 articles on Skeet Shooting. Cut it out. When all 12 have been cut out, you will have complete article of all the sportsman's sport which is rapidly becoming the rage across Canada.

We endeavor to give our readers a complete service of local and national events

A general meeting of the Carbon Literary and Social Club will be held in the I.O.O.F. Club rooms on Friday, October 5th, at 8 p.m., for the purpose of electing officers and organization for the coming year. Old and young are cordially invited to attend.

XXXXXXXXXXXXXXXXXXXX

THANKSGIVING DAY IN CANADA

Thanksgiving Day has been set by Act of Parliament for Monday, October 8th, this year, and all places of business must observe the holiday. To Newfoundland, the oldest colony of the British Empire, belongs the honor of having the first Thanksgiving celebration on this continent. This was in 1578 and it was conducted by a clergyman who accompanied the expedition which under Sir Martin Frobisher brought the first British immigrants to the New World. It must have been a stirring and a picturesque ceremony and they had much to be thankful for after their voyages. In these days the voyage was a really hazardous adventure. To the perils of the sea in the little caravels that were the ancestors of the modern ocean-going vessels were added the possible infection of leucism of the crew. He knew neither day nor night when they saw a chance to plunder as well as the navy of the nation with which the nationals of the adventures or rather their kings and princes happened at the time to be at war.

There has been some talk about the idea. It was true that the churches observed the harvest festival but Thanksgiving does not seem to have been a national day of celebration until October 9, 1879 when it was declared that a general day of Thanksgiving should be held and was duly observed on November 8th following.

There had been days of observance of Thanksgiving for special events before this. Upper Canada proclaimed a Day of Thanksgiving in June 1816, to mark the close of the War of 1812. A day of Thanksgiving for the whole of Canada was proclaimed

on March 1, 1872, for the restoration to health of the then Prince of Wales who was afterwards King Edward VII.

The philosophy of the succeeding Thanksgiving proclamations has varied a little since the first one was written. In the early days of the present century Canadian Thanksgivings have been held to correspond with that of the United States and there were some advantages in this arrangement but it was felt that the date chosen by the British—the last Thursday in November, was late to serve the Canadian celebration. A Thanksgiving for the harvest and a Thanksgiving in October was chosen for a year or two. Afterwards to suit the convenience of travelers and others whose business took them away from home a Monday was chosen.

During the 1911 session of the Canadian Parliament some one hit upon the happy idea of having Armistice Day and Thanksgiving Day observed on the same day and the date was fixed as the Monday in which November falls on Monday, October 8.

Two or three years ago this act was revoked and Thanksgiving and Armistice days were separated, the date to be set each year by Act of Parliament for Thanksgiving. Since that time parliament has chosen the second Monday of October as Thanksgiving day, and this year the date has been followed and Thanksgiving Day falls on Monday, October 8.

Canada has now a day of national pride and human service. We are the Chosen People. Every one of us before—or must it be a kind of paradise before we admit gratitude.

The day is a day of thanksgiving for Canada, a day of thanksgiving for the harvest and a day of national gratitude for the sacrifices of those who do not share the conveniences with us but who made them possible.

The harassed looking man was being shown over some more. "That machine" said the man, "does the work of fifty men."

The man smiled slightly. "Yes, that," he said, "I have seen what my wife should have married."

"Fresh from the Gardens"

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles reviewing the history of this famous cup and setting forth facts and figures indicating the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to indulge in this sport. This yacht race is not a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the trial races and the short race period runs well over a million dollars, and with several boats involved, the total cost is staggering. It is all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly so at this time when millions of people in the two countries concerned are in need of the more necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellow-men?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the everyday toils and worries of life, and it should, therefore, be engaged in, not by a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of the individual, coupled with the instruction and development of those traits of character which recognize and insist upon fair play, respect for a competitor, observance of the rules of the game whatever the nature of the contest, and defeat with good grace and a smile, and of victory with a becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into money-making enterprises it ceases to be sport. In its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to aill.

Unfortunately, much of the so-called sport of today has degenerated from the ideal of amateurism to professionalism; from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true in baseball in the United States. Tens of thousands of people pack the stands to watch eighteen highly trained experts "play" ball. These thousands cheer themselves hoarse for the "home" team, although not one of the "players" has a notion of what is sport. In its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to aill.

In its heyday, lacrosse, the old national game of Canada, was an amateur sport. Thousands of boys engaged in it for the love of the game and the exercise they obtained. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint. What and who are responsible for this intrusion of the money-grubbing instinct of men? Secondly, universities and colleges to a considerable extent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a champion ship crew or team in the varied departments of sport to carry the college colors to victory and thus advertise the university and command the admiration and ultimate respect of youth throughout the country. It is no longer sport in its true sense, but a business proposition with such limitations.

With but few exceptions people love sports. Practically every child likes to play games. It is a natural born instinct, and it has its place and a big place, in the physical, mental and moral development of youth. But it is being perverted to gross material ends, with the result that sport in its real sense is largely lacking in the larger centres of population, and we must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning should be strongly encouraged everywhere, but it is time a halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

Use Ultra-Violet Rays

Planes Equipped For Toning Up

Planes on instruments in London Zoo give salute to standard equipment on aeroplanes engaged in night flying.

Pilots found that the addition of the instruments and gauges became dull unless radio-activity in them was stimulated. One of the zoo's ultraviolet-ray boxes were installed. The boxes, not much larger than a matchbox, were placed in the steering post arms in the planes. Monkeys house was enthusiastically since ultra-violet rays are invisible giving the "Heil Hitler" with up there is no reflection against the raised paws whenever visitors are surrounded when the pilots use them.

Monkeys Have Gone Nazi

Animals in London Zoo Give Salute

A special cable from London to the New York Herald Tribune says that the animals of the Regent Park zoo have gone Nazi.

In a recent week, it appears, a German visitor to London taught them to give the Nazi salute in return for bananas. Other Simians promptly followed suit, and the zoo's chimpanzees, monkey house was enthusiastically since ultra-violet rays are invisible giving the "Heil Hitler" with up there is no reflection against the raised paws whenever visitors are surrounded when the pilots use them.

Looseness Of The Bowels During the Summer Months

It is seldom during the summer that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to take the system. Do not check the discharges too suddenly. Do not experiment with a new and untried remedy. The use of Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 80 years. Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it. Put up only by The T. M. B. Co., Ltd., Toronto, Ont.

Prince Assisted Miners

Waived Royalties Until Mine On Estate Was Self-Supporting

The Prince of Wales went down a Somerset coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the English lords of England, who conducted him round the mine. Thirty years ago a coal mine at Farrington Quarry closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole".

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field. It lay in the prince's dukedom estate.

The prince lent a sympathetic ear to the miners' plea. He told the men the duchy would waive any royalties until the mine was self-supporting.

The prince's aid was not without effect. After deep excavating they struck coal. Every now and again the prince inquired how the mine was working.

Now the mine is paid for itself. Fifty men are in full-time employment; one hundred and thirty-five are in a half-time coal mine.

Every week. And the Duchy of Cornwall is receiving its dues.

The prince received a royal warrant from the Black-faced colliers.

Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal. He reappeared, his hands black from the low corridors where he had bent almost double.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never walk again. Although he is 70 years old, he proved they were wrong.

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than I was ten days ago. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many of my friends. I am not getting in out of bed myself, nor sit up myself, but I am able to get up at a day sometimes. Kruschen Salts are the best."

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. The other ingredients assist Nature to expel these dissolved crystals through the natural channels. In addition, there are still other salts in Kruschen which prevent food fermentation in the stomach, and thereby check the further accumulation of uric acid. Uric acid is one of the other body poisons which undermine the health.

Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-built man in brown suit and hat and brown shoes was standing in an Oxford-street book shop in a recent week.

He had found his way to a large collection of books, some old but most of them recent, dealing with every phase of life in the British Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage or both. As a matter of fact, he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

In the three Prairie Provinces on August 10, 1934, the estimated acreage showed a decrease of 1,881,000 acres, or 7.5 per cent. in wheat; a decrease of 70,000 acres or 2.3 per cent. in barley; and a decrease in flaxseed of 17,500 acres, or 7.4 per cent. In the three Prairie Provinces on August 10, 1934, the estimated acreage showed a decrease of 1,881,000 acres, or 7.5 per cent. in wheat; a decrease of 70,000 acres or 2.3 per cent. in barley; and a decrease in flaxseed of 17,500 acres, or 7.4 per cent.

Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada. Hon. George H. B. Edwards, chairman of Canada's tariff board, declared before the maritime conference on Canadian affairs held at Halifax.

A tax on about 10 cents a gallon is levied on gas-oil in England.

Need Coin-Container

Philatelists Sending Money Through Mail Use Variety Of "Stickum"

A crew of 15 postal clerks at Yellowstone Park, Wyoming, which handled the 80,000 requests for first-day covers on the new Yellowstone stamp issued recently, wonder why anyone has not invented a special coin-container for philatelists.

Collectors sending in five, ten, twenty-five, and fifty-cent pieces used every conceivable method in making the cash enclosures with the envelopes which they wanted to carry the new stamp as well as the cancellation mark from the Yellowstone post-office on the first-day covers. Tar, adhesive tape, molasses, wax, honey, chewing gum and syrup were among the varieties of "stickum" employed.

The clerks all exhibited nose thumbs and fingers from licking for the well-protected cash.

Delaware, with only three, has the smallest number of counties of any state in the United States.

If some men would work more and lose less they would get along better.

Air Survey Reveals Ruins

Ancient Earthworks Sunken For Centuries Were Invisible From Ground

A moundbuilders' ceremonial chapel and an ancient roadway, approximately two and one-half miles long, were discovered for the first time near Newark, Ohio following completion of an aerial survey by Captain A. W. Stevens, integral army photographer and participant in the recent ill-fated attempt to invade the stratosphere.

The discovery was made by Dr. Henry C. Shetrone, archaeologist and director of the Ohio State Museum while examining air photographs taken by Capt. Stevens at museum offices in Columbus, Ohio.

Invisible from the ground, these once mighty ancient earthworks, believed constructed by Hopewell Indians, have lain sunken for centuries unnoticed by residents of this vicinity.

The roadway, which is 150 feet wide, is of perfect geometric proportions and indicates that people of the Hopewell era had some knowledge of the mathematical science, museum officials believe.

A keyhole-shaped figure on the air photo, the chapel, which lies at the road's southern termination, is approximately 200 feet in diameter at its circular part and is believed to have been of ceremonial office of the Hopewell tribes.

Located between two perfectly proportioned circular Indian mounds, south of the city, the territory in which the new discoveries were made has long been a mecca for archaeologists and tourists.

Tunnits and elaborate underground burial rooms similar to those found in the world famous ancient Egyptian pyramids, also products of Hopewell culture, might be found as a result of the new discovery. Shetrone believes.

First research of the Newark Indian burial grounds was made in 1848 by Augustus S. Tappan, early archaeologist who explored Ohio and the Middle West.

Although they indicated the beginning of the roadway in map made with the Smithsonian Institute in Washington, no further trace of the earthworks had been discovered until the air exploration by Captain Stevens, museum officials say.

When Duties Are Divided

Work Is Very Seldom Done As It Should Be

Affairs at the French ministry of finance, where the windows are never closed because, as someone has just discovered, the ministry of finance is responsible for the inside and the ministry of fine arts for the outside, and the two ministries never arrange to change their respective windows, almost exact parallel nearer home in early Victorian days. When the prime consort began inquiring into arrangements at Buckingham Palace, which he found far from satisfactory, he was informed that the French chamberlain had charge of the interior rooms except the kitchen and pantries, which were under the charge of the French steward, and came under the office of wools and forests, and that they likewise failed to synchronize in cleaning the windows. On demanding why there was never a fire in the dining room, he was told "the lord chamberlain says the fire, and the lord steward lights it." As the underlings of these two great officers were in disagreement the queen was left to dine in the cold, Manchester Guardian.

Cook's Home Rebuilt

In Australian Park

Even Ivy Taken To Melbourne With Explorer's Cottage

Packed in 25 boxes and transported by 33 horses, Captain Cook's cottage was taken through the streets of Melbourne, Australia, on its arrival by the steamer to the Fitzroy Gardens, where it is to be re-erected in connection with the centenary celebrations.

Everything about the Yrkshire cottage has been preserved with amazing thoroughness, even to the creak on the staircase, as it will be remarked. Stones for the walls, rafters for the floor, joists, rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar which held brick and stone together, also a bag of nails which will not be used for hammering in, but interesting as showing the type used.

The ivy alone will not be replaced in its original state. The quarantine authorities demand that it be fumigated, as a potential bearer of disease. In exchange for the cottage, Cook's birthplace, Great Ayton, Yorks, is to possess a stone tablet modelled on the monument commemorating his discovery of "Cape Everard."

Fall yield in Canada, as at August 10, 1934, showed a yield of 5,239,000 bushels from 587,100 acres, compared with 5,454,000 bushels from 615,900 acres in 1933.

Of 35,500 insured workers in London, England, only 700 are out of work.

It "Helps Me!"

"That's what 98 out of 100 women say after taking this medicine. It quietens my nerves, gives them more energy, makes me feel like a child again, and makes life so much more enjoyable."

LYDIA E. PINKHAM'S
VEGETABLE COMPOUND

More and more, every day, thirty thousands are finding new uses for Dr. Lydia E. Pinkham's Vegetable Compound and "Centre Pull Pills."

Prepares the digestive and flavor organs, the "baked goods, meat and fruit. A good substitute for refrigerator in cold weather.

Yours truly, Druggist, or stationer keep them.

Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFFEN
RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin. Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disappears, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show that Aspirin does not harm the heart. Remember these two points: Aspirin Speed and Aspirin Safety. Not see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get 12 tablets or economical bottles of 12 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to dissolve.

What happens in these eleven seconds? Aspirin starts to dissolve, and its pain relieving action begins.

When in Pain Remember These Pictures

—ASPIRIN DOES NOT HARM THE HEART—

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

(Now Go On With The Story)

CHAPTER I—Continued

"What seems to be the trouble?" Keene's tone was anxious.

"Exactly what I asked old Ben. He said that as far as he can see, there are two reasons: Carr is mighty old fashioned, — and the Broken Spur is next to 'em."

"Well, what of it? These days some one's got to be next door."

"Fish. You're damned innocent for the man I know you to be. I suppose you never heard of rustling?"

"That's archaic," said Keene sharply. "Men don't rustle these days."

"Think so? Wait a bit! Old man Carr is always short of cash. He has to hire his men just for the time he needs 'em. He's got about four or five men permanently on his payroll. That means that poverty keeps him from building up a bunch of ranches he could count on to charge him with a cup of water if the Hour-glass needed it. He's honest, too, and that's a handicap when he lives next to the Broken Spur. For years Dustin and Goddard have been trying, by a lawsuit, to get the water supply that makes the Hour-glass valuable. Can't you see what happens? Old man Carr, crippled, is being robbed, deaf, dumb and blind to make him sell his place."

"But he can only sell his share. Half of the place is mine."

"Well, then . . . Stone haired himself erect in his chair. "It looks to me as if one Gene Stone, before long, will find himself partner to two crooks. If old man Carr is right. Don't you see? Old man Carr will have to sell his half of the Hour-glass to these men Dustin and Goddard to stand square with the world."

"Does your friend Lyon say these men Dustin and Goddard are two crooks?"

"He didn't have to say so. He said he couldn't understand 'em. Old Ben is so straight that the only man he doesn't understand is a crook. Why?"

"Well . . . I told old man Burwell I was going to run down to the Hour-glass."

Dr. Wernel's Powder For FALSE TEETH

A Joy To All Users

Caution! Dr. Wernel's Powder and you want to have a think about your false teeth all day long. You want to be sure. Let anything you want to hold plates firmly in place—there's nothing can't slip or slide. Form a protective cushion for sensitive gums. Leave no redness, irritation, inflammation. Rub gently with moist finger. Prescribed by world's most famous dentist. The cost is small—the comfort great. Any druggist.

W. N. U. 2065

Hour-glass or the Broken Spur, you wire for one Gerald Keene. That's me! I'll help you chase the ben off the neck."

"Wait . . . Keene came back from the closet with a bottle and glasses. "Here's the health of Keene!"

"All right, Old Timer. To the health of the new Duru Stone!"

CHAPTER II

"There he comes now! That's old Dad Kane as sure as a shoelace."

"Sam Dustin, half-owner of the Broken Spur ranch, jerked a finger to the west as Spike Goddard, his partner, rose slowly and squinted into the dust-haze of the range."

"You're a damned fool over to have gubbated that old fool Dad Kane," he said explosively. "It's all your doing, too. Three hundred dollars plunked through my away!"

His words carried a sting. They were meant to do just that. Everything that Spike Goddard said or did carried a sting. His red face, his cold blue eyes, his wire-stiff reddish beard all bespoke combatsiveness and Dustin felt that sting. He knew that silence under the whip-lash of his tongue would annoy Spike more than any speech."

Dustin and Goddard had owned the Broken Spur for several years and all Crevasse County wondered how they made it pay. That they did make money was clear but none knew how they did it. Old Sam Peters, the deceptively old and the only bank in Secco, could have told him. But there were good reasons why Peters should tell nothing that affected Sam Dustin."

"If you'd told me three years ago that they were aiming to grubstake old Shadrach Kane's place, Goddard, I'd have told you it was the ac' of a damn fool."

"I knew it," then you stopped me from taking up the Bar Circle range lease for grass," snapped Dustin. "That cost us over ten thousand dollars. And because you were scared to take a chance."

This time Spike flushed. A man does not care to be reminded of his tinorous moments that cost him money. He stood by his partner, however, and said nothing. Two owners of the Broken Spur, Spike and Dustin, had a perfect foil for his partner who was as Jameson, Editor of the Secco Courier said: "As real as the fox and twice as shifty. I wouldn't trust the pair a—her'd I'd trust coyote in a hen."

"The negro cook came out and pounded the supper summons on a big iron triangle that hung on the wall. The negro cook came out and pounded the supper summons on the two partners gave no sign. They continued to stare across the corral at a great red dust-cloud that moved slowly along the distant wire-fence. Inside that dust-cloud dim shadows moved themselves into three parallel burrows followed by a shuffling figure that prodded the rear-most burro with a short goad. At each prod the reluctant burro trotted a few steps but dropped back into a walk. Dustin laughed."

Laws of Physics

Institute Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J. S. McKenack at Sudbury, Ontario, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan, two suspended leaden balls of equal weight. When one ball swings slowly in struck on one swinging rapidly in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion becomes almost motionless. An authority of physics points out that if two bodies of differing momentum (weight multiplied by velocity) meet, the resultant momentum will be the same in direction as that of the heavier body. The majority carries. An electric current always is passing from the atmosphere into the earth."

More ice is consumed throughout the world to-day than any other food product.

Of the 150,000 active physicians in the United States, about 100,000 are connected with hospitals.

"The negro cook came out and pounded the supper summons on a big iron triangle that hung on the wall. The negro cook came out and pounded the supper summons on the two partners gave no sign. They continued to stare across the corral at a great red dust-cloud that moved slowly along the distant wire-fence. Inside that dust-cloud dim shadows moved themselves into three parallel burrows followed by a shuffling figure that prodded the rear-most burro with a short goad. At each prod the reluctant burro trotted a few steps but dropped back into a walk. Dustin laughed."

Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant." Psalm 119:76.

Love divine has come and counted Every tear it caused to fall; And its storm which Love appointed Was its choicest gift of all.

A Big Change

Lord Willington went from Croydon to Delhi in a week. So much has air travel accomplished. When the first Victoria, Canning, went to his duties in 1858 the trip took more than five weeks. Steamships were slow, and there being no Suez Canal the way was round the Cape.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver is a very small organ, but it is one of the most important organs of the body. It is the only organ that can be replaced. If it is not working properly, it will cause a great deal of trouble. You can't completely remove any condition of the liver, but you can make it work better. You can make it work better by taking Carter's Liver Pills. They are purely vegetable, and they are the only pills that can be taken without any danger. They are the only pills that can be taken without any danger. They are the only pills that can be taken without any danger.

An auto-aid attachment has been designed for telephones in England that reduces the number of motions from seven to two when getting a number.

Average income of a doctor is about \$5,000 a year, and that of a surgeon \$9,000.

AIR-CELL BRINGS AN ENTIRELY NEW THRILL IN RADIO

... TO HOMES NOT HAVING ELECTRICITY!

"Heard the big ball game this afternoon, Jim—came in clear as a bell. No, we haven't electric wiring at home, but our new Air-Cell radio sounds every bit as good as any could!"

"I used to get into town every time our storage battery ran out. This new radio means always being at home, and I don't mind staying home, though, because our Air-Cell set brings in programs we never heard before."

"That new Air-Cell radio is a wonderful convenience. Our old storage battery was at it twice a day, and I don't think we could get the music loud enough. This new set has such an even current that you can hear perfectly all the time."

The invention of the EVEREADY Air-Cell® Battery has made possible this entirely different battery-powered radio that brings the glorious full tone hitherto only heard in electric sets.

The EVEREADY Air-Cell® Battery lasts for at least 100 hours, which is 3 times as long as the average household, and so does not need a new battery. This new set has such an even current that you can hear perfectly all the time.

In conjunction with EVEREADY Raytheon® Batteries, Air-Cell radios, made by the leading radio set manufacturers, will perform with all the simplicity and reliability of any electric set.

Mrs. Fred Morrison, one time resident of Carbon, and now of Elthick, spent Wednesday visiting at the home of Mr. and Mrs. H.N. Elliott.

A large number of Carbon Masons attended a district meeting of the organization at Drumheller on Wednesday evening.

Mr. and Mrs. T.J. Ramsey have recently purchased the bakery business from Paul Stefan and the new proprietors took possession on Monday of this week. A first class baker from Calgary has been engaged and high class products will be turned out. The new proprietors look forward to a share of your business.

A very successful horse sale was conducted in Carbon on Saturday afternoon last by auctioneers Wright of Carbon, and Fitzsimmons of Hanne.

REGISTERED SEED GRAIN FOR

SALE ON TRADE—Registered first generation grade 1 Marquis wheat—

Registered first generation grade 1 Victory Oats. Will trade for conventional grain on basis of one bushel seed wheat for two bushels No. 1 Northern. One bushel seed oats for two bushels 2 CWs. This trading arrangement makes the price about one-half the cost of this quality of seed if purchased through seed houses—Jas. Hoffmann, Drumheller, Alberta. 21p

The Dominion government will pay 25 per cent of the freight charges from the shipping point to stockyards at Edmonton and Calgary, with the province assuming the balance. Shipments will commence at once. These facts are in connection with the shipment of cattle from the div. 4 area.

Canadian Pacific flagship shipress of Britain claimed a new record recently for the Quebec-Charlottetown crossing, making the trip in four days, six hours and fifty-eight minutes, being thirty-four minutes under her own previous record set in August, 1932.

Montague Norman, governor of the Bank of England, whose creative genius has given newspaper men some strenuous times in the past few years, actually posed for a photograph aboard Canadian Pacific liner Duchess of Bedford on his return to England recently. "Well, till I get my hat on straight," was his comment to the assembled and gratified photographer.

Railway building is by no means at an end in Canada. E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, stated recently following an extended inspection trip through Western Ontario, "Completion of our development will probably mean construction of more railway miles to outlying districts as prospects and development attract," he said.

1934 REFUNDING LOAN

The Minister of Finance offers for public subscription.

Two-year 2% Bonds, due 15th October, 1936

Issue price: 98.50 and accrued interest, yielding 2.67% to maturity.

Five-year 2½% Bonds, due 15th October, 1939

Issue price: 98.15 and accrued interest, yielding 2.90% to maturity.

Eight-year 3% Bonds, due 15th October, 1942

Issue price: 97.00 and accrued interest, yielding 3.43% to maturity.

Fifteen-year 3½% Bonds, due 15th October, 1949

Issue price: 96.50 and accrued interest, yielding 3.81% to maturity.

Principal payable without charge in lawful money of Canada at the Head Office of the Bank of Canada, Ottawa, or at any of its branches in Canada.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any chartered bank.

Denominations

Two-year Bonds, \$1,000

Five-year Bonds, \$500 and \$1,000

Eight-year Bonds, \$500 and \$1,000

Fifteen-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds

and the Five-year 2½% Bonds.

100% of their par value on subscriptions for the Eight-year 3% Bonds

if effected on or before 6th October, and 100% of their par value

after that date.

100% of their par value on subscriptions for the Fifteen-year 3½%

Bonds if effected on or before 6th October, and 100% of their par value

after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada. The proceeds of this Loan will retire \$22,216,830 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 15th October, 1934, with or without notice, at the discretion of the Minister of Finance.

DEPARTMENT OF FINANCE,
OTTAWA, 1ST OCTOBER, 1934.
